

# ADNAN HAIDER

Lahore, Pakistan | +92 310 4308125 | [adnanaadi792@gmail.com](mailto:adnanaadi792@gmail.com) | [LinkedIn](#) | [GitHub](#)

## EDUCATION

### COMSATS University Islamabad, Lahore Campus

Aug 2024 – May 2028

Bachelor of Science in Computer Science | GPA: 3.52 / 4.00

**Relevant Coursework:** Programming Fundamentals, Object-Oriented Programming, Data Structures & Algorithms, Web Technologies, Machine Learning, Artificial Intelligence

## PROJECTS

### AI-Powered Cold Email Generator [\[link\]](#)

2025

LangChain · Groq · ChromaDB · Llama 3.3 · Streamlit · RAG

- Engineered an end-to-end RAG pipeline using LangChain and Groq to auto-generate personalized B2B cold emails from job postings, achieving structured JSON extraction from unstructured text.
- Implemented semantic search with ChromaDB to map job requirements to portfolio projects, increasing relevance accuracy of generated emails.
- Deployed a Streamlit web interface integrated with Llama 3.3 for sub-second response times, making the tool production-ready.

### AI Restaurant Brand Generator [\[link\]](#)

2025

LangChain · Groq · LCEL · Streamlit · Llama 3.3

- Built a multi-stage AI branding tool using Sequential Chains (LCEL) to automate brand naming and menu generation, reducing creative brainstorming time by 90%.
- Engineered context handover between chain modules, ensuring brand consistency across generated outputs.

### Course Registration System [\[link\]](#)

2025

C++ · AVL Trees · Max-Heap · Graph Algorithms · File I/O

- Designed a university enrollment system using AVL Trees, Max-Heaps, and Stacks, supporting 4 core DSA operations including GPA-based waitlist prioritization.
- Implemented cycle detection via recursive graph traversal to prevent invalid prerequisite dependencies, ensuring data integrity.

### Restaurant Management System [\[link\]](#)

2024

C# · Windows Forms · SQL Server · Stored Procedures · AForge

- Developed a full-stack POS and management system with role-based access control, dynamic menu generation from database, and real-time inventory alerts.
- Integrated webcam-based intruder capture on failed logins using AForge.Video, adding a security layer to the authentication system.

### Real-Time Desk Presence Tracker [\[link\]](#)

2024

Web · JavaScript · Role-Based Access

- Built a lightweight web tool with dual roles (User/Admin) to track real-time desk presence for a 50-member team managing 100+ registrations, eliminating manual attendance tracking.

## TECHNICAL SKILLS

**Languages:** Python, C++, Java, C#, SQL

**AI / ML:** LangChain, Groq API, ChromaDB, RAG Pipelines, Prompt Engineering, Llama 3.3

**Frameworks & Tools:** Streamlit, Windows Forms, Git, GitHub

**Databases:** SQL Server, ChromaDB (Vector DB), File-Based Persistence

**Concepts:** OOP, Data Structures & Algorithms, REST APIs, Sequential Chains (LCEL)
